Explanation of the symbols used :—C=Cases ; D=Deaths.

NEW DELHI 3 (INDIA) ;

The 26th December 1949.

S. P. JAIN,

for Registrar General, India.

NATIONAL SAVINGS CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 5,000 in them (inclusive of any Post Office cash certificates held).

If particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in the Provinces of India and some of the Indian States for the week ending the 26th November, 1949.

REMARKS

The figures of births and deaths shown in this statement for the week ending the 26th November 1949 relate to 190 towns with an estimated population of 24,591 thousands. The total number of towns is 224 and their population is 27,293 thousands. Thus 85% of the total number of towns representing 90% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 19,050 and 9,912 representing birth and death rates of 40.3 and 21.0 per thousand of population respectively

(A) *Indian Provinces.*—The data here relate to 164 towns with an estimated population of 21,749 thousands. Information for Bihar and Assam could not be included. The total number of towns is 192 and their population is 23,759 thousands. Thus 85% of the total number of towns representing 92% of the total population is covered. The numbers of births and deaths recorded in these towns were 17,100 and 9,677 representing birth and death rates of 40.9 and 21.7 per thousand of population respectively. The table at the

end gives the position by provinces.

The towns of Nellore in Madras and Banaras in U. P. recorded high death rates of 63.2 and 51.8 per thousand of population respectively. In Nellore, the high death rate was largely due to deaths from fevers and respiratory diseases. In Banaras, the high death rate was mainly due to deaths from fevers, respiratory diseases and dysentery and diarrhoea.

(B) *Unions and States.*—The data here relate to 26 towns with an estimated population of 2,842 thousands. The total number of towns is 32 and their population is 3,534 thousands. Thus 81% of the total number of towns representing 80% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,950 and 835 representing birth and death rates of 35.7 and 15.3 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
